The civil scope. Connected.

Civil construction and infrastructure support for energy developers, owners and EPC teams across the Southwest.

01 Preconstruction & project support

Estimating, constructability, procurement and project planning that connect the bid to the field.

02 Earthwork & site preparation

Clearing, excavation, mass grading and access infrastructure for demanding project sites.

03 Drainage & underground utilities

Stormwater, water and sanitary infrastructure coordinated with the wider civil package.

04 Structural concrete

Equipment foundations, pads and structural concrete supporting energy infrastructure.

05 Ancillary civil construction

Trenching, backfill, fencing and access improvements that support the complete civil scope.

06 Process equipment setting

Equipment setting support aligned with foundation readiness and installation requirements.
